

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Newly retired, after spending many years working with his brother to build their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time conversing with past business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered a vast market for a product that could quickly and securely lift people in the air to accomplish upkeep and other building services.

After returning from their vacation, John set up a partnership with two of his friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design elements of that original lift into current versions.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into many marketplaces worldwide and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
