

Advance-Nilfisk Parts

Advance-Nilfisk Parts - Imagine how long and tedious it will be to clean-up after a party, without help from machines. Not too long ago, the dust from upholstery and carpets had to be beat out of them manually; cleaning cloths, brooms, and brushes were the leading cleaning products at the time.

The founder of Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who really liked to work on electrical motors. After founding his business during the year 1906, he began to produce motors to drive coffee grinders, fans, machine tools and drills. Mr. Fisker's vision from the start was to have a global business selling goods internationally.

The Nilfisk C1 was an incredible breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and can be operated by a single individual. This invention came in a time where numerous cleaning machines were very big and needed 4 or more operators, thus, the Nilfisk C1 transformed everything and evolved the way we clean forever. The brain behind these very first cleaning equipment remains unparalleled. Cleaning machines provide a brilliant solution to an ongoing dilemma; things get dirty and must be cleaned regularly, without too much effort.

Slowly, the business Nilfisk-Advance grew through the years. During the early nineteen eighties the business developed fast when the business became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance ahead within the trade, aspiring to be an active global player in manufacturing professional cleaning equipment. Nilfisk-Advance is now found in every part of the world by gradually acquiring lots of small companies in order to grow their product portfolio and presence in new markets. They are really proud to present a range of cleaning solutions to fit each and every requirement.
