The U.S. lift Truck division located in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national equipment expansion project. Initial sales of this industrialized equipment focused on large business communities, the armed forces and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo began the first domestic lift truck business in 1967, and rapidly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a position of considerable growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling market. This endeavor greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a new plant which helped launch the business for the manufacture of high end added-value goods suited for export. In 1993, the corporation had a international sales network and started exporting designs they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
