

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts may be specifically labeled to be used in hazardous locations. A labeled forklift indicates the design has met the lowest requirements of ANSI/UL 558 intended for engine powered trucks or ANSI/UL 583 utilized for electric lift trucks for the type of label attached.

Applications for marked trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for further info about the approved uses of industrial powered forklifts in your application.

If the certain forklift meets the outlined criteria, labels could be put. A labeled forklift would show the type of designation placed on the nameplate and would have a correctly corresponding label placed.
